DETAILED ACTION

Priority

1. ***Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.***

Information Disclosure Statement

2. ***The information disclosure statement filed 12/04/00 has been considered and placed in the application file.***

Claim Rejections - 35 USC § 112

3. ***The following is a quotation of the first paragraph of 35 U.S.C. 112:***

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. ***Claims 12 and 20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. As far as the Examiner can tell, no express support can be found for the limitation "a copolymer of 85 to 98% by weight acrylate and 2 to 10% by weight acrylonitrile" per the claims supra, and, as such, this engenders a New Matter situation.***

Claim Rejections - 35 USC § 112

5. ***The following is a quotation of the second paragraph of 35 U.S.C. 112:***

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1713

6. *Claims 6-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.*

A) *The recited "copolymers of at least one acrylate and acrylonitrile" per claim 6 constitutes indefinite subject matter as per it not being known by any rules of Chemistry that would allow for a copolymer to comprise "monomer(s)" VS "units of monomer(s)". See, also claims 12, 16, 19, 20 and 23 relative to the above matter.*

B) *The recited "fatty compounds" per claims 6 and 15 constitutes indefinite subject matter as per the metes and bounds of such engender an indeterminacy in scope.*

C) *The recited contents per claims 7-11 and 19 constitutes indefinite subject matter as per it not being readily ascertainable as to the exact entity that such is being based on, i.e., total jointing compound or other.*

D) *The recited "additionally comprising one or more additional components" per claim 10 engenders redundant subject matter.*

E) *The recited "fatty alcohols and derivatives thereof and having a molecular weight between 300 and 1,500" per claim 17 constitutes indefinite subject matter as per: a) the metes and bounds of "derivatives thereof" engender and indeterminacy in scope; b) it is not readily ascertainable if "number average" or "weight average" is the qualifying entity for the recited "molecular weight", the two being substantially different. See also claim 19 (b) relative to "derivatives thereof".*

F) *The recited "comprising a copolymer" per claim 20 constitutes indefinite subject matter as per it not being readily ascertainable as to how such further limits the antecedently recited component (a). Is it the same as or in addition to the already cited copolymer?*

Art Unit: 1713

G) The recited "comprising one or more fatty acid esters" per claim 21 constitutes indefinite subject matter as per it not being readily ascertainable as to how such further limits the antecedently recited component (b).

H) Claim 25, in its entirety, engenders awkwardly and ambiguously expressed claim language as well as incomplete process steps.

Allowable Subject Matter

7. Claims 6-26 are deemed allowable. The claims would be allowed if amended, rewritten and/or satisfactorily rebutted so as to overcome the 112 issues raised supra. The instantly claimed invention is deemed allowable over the prior art of record as per said art neither anticipating nor rendering obvious the precisely defined polyacrylate jointing compound, as claimed. One having ordinary skill in the art would not have been endowed with any motivation to extrapolate the precisely defined polyacrylate jointing compound, as claimed, from any of the prior art of record with any reasonable expectation of success.

Conclusion

8. The prior art made of record and not relied upon is considered illustrative of the general state of the art.
